DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1 – 18, 20-21, drawn to specifics of a stationary barcode scanning apparatus, classified in class 235, subclass 462.14.

Group II: Claims 19, 22-28, drawn to specifics of a wand type reader and a method of using the same, classified in class 235, subclass 472.03.

2. The inventions are distinct, each from the other because:

3. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires, among other things, the portable scanner for manually reading barcodes a plurality of time. The subcombination has separate utility such as portable barcode reading means.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2876

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with Edward H. Green, III (Reg. NO. 42,604) on June 13, 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-18, 20-21. Affirmation of this election must be made by applicant in replying to this Office action. Claims 19, 22-28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. This application is in condition for allowance except for the following formal matters:

Drawings

9. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings must be submitted by applicant in replying to this Office action.

Specification

10. The specification is objected to because of the following informalities:

Page 4, line 7: Substitute "fr4om" with --from--.

Appropriate correction is required.

11. Claim 18 is objected to because of the following informalities:

Re claim 18, line 1: Delete "said".

Appropriate correction is required.

12. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

13. Claims 1-18, and 20-21 are allowable over the prior art of records.

14. The following is a statement of reasons for the indication of allowable subject matter:

Although, the best prior art of record to Tanaka et al. [US 5,473,148] a plurality of light emitting diodes and sensors to detect the moving speed of card in series, Laskowski et al. [US 6,101,266] discloses a scanning system for scanning having a plurality of light emitting diodes and photocell to reading/determining conditions of bank notes, and Jannersten [EP 1,040,854] disclose a plurality of light sources/sensors to reading barcodes. However, Tanaka et al., Laskowski et al., and Jannersten taken alone or in combination of other references, fails to teach that the sensors and light sources are arranged such that each one of the plurality of sensors senses reflected light primarily from a corresponding light source, wherein all of sensors are operative to read the same barcode element in succession as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
